

# XII Annual Conference of the International Research Society for Public Management

## Call for Papers

### Public Management in Practice

The “Public Management in Practice” Panel will focus on a specific theme: **the capacity of public organisations to engage in long-term strategy development and effective program implementation, as against being largely preoccupied with short-term crisis management and policy-on-the-run.** The over-riding question is how do public managers both “cope” and “achieve outcomes” in this context?

This is particularly timely given the challenges of complex problems (social, ecological, technological, emergency response, etc) that public organisations internationally are facing, and the turbulent political environment in which the public sector typically operates.

This panel will comprise papers and presentations from two sources:

- Researchers: international experts in the field of public management strategy.
- Practitioners: senior executives invited from the three tiers of government in Australia (i.e. Local, State and Federal).

Researchers please contact [brian.head@uq.edu.au](mailto:brian.head@uq.edu.au) if you are interested in submitting an abstract for the academic stream of this panel. Practitioners will be directly invited to give presentations.

Professor Brian Head
